STEP 01 | CREATE A FREE ACCOUNT ON CANVA

Canva is an online design platform that will allow you to personalize your new wedding invitations. **You will not need a Pro account** – everything you need is on the free version!

Click to create an account on Canva: **Canva.com/signup**

STEP 02 | PERSONALIZE YOUR INVITATION

Everything on the invitation template (with the exception of your custom venue artwork!) is completely customizable – you may change colors, fonts, sizes, and layout. If you have a wedding website, don't forget to add your own QR code to make the RSVP process a breeze!

Click to open the template in Canva: **Watercolor Wedding Suite Template**

STEP 03 | PRINT YOUR INVITATIONS

Canva lets you print your invitations straight from their platform, even offering the option to include white envelopes! When you're ready...

1. Click **"Print with Canva"** in the top right corner.
2. Choose your preferences
   – Leave the "print as sets" unchecked – you don't need that
   – We enjoy the **Deluxe or Hemp paper with an uncoated finish,** but you can click here to read more about the paper options.

If you have any questions about the template, or would like to discuss other custom artwork/design for your wedding, please contact Haley at hlyarndt@gmail.com.
